1. Interview those who know the student using the form Identifying Items for Inclusion on Preference Assessment. List identified items on table above.
2. Observe the student in an unstructured “free access” situation. Any item not identified in step one may be included on the list.
3. Offer the student item #1. Observe student’s reaction. Check off response in appropriate box. Repeat until all items have been offered to student.
4. Prioritize student preferences by completing the Paired Reinforcer Assessment (Step 3).
